

## TABLE OF CONTENTS

Abstract.....	ii
Acknowledgments .....	v
Table of contents.....	vi
List of Tables .....	viii
List of Figures.....	ix
1. Introduction.....	1
1.1 Motivation and objectives.....	1
1.2 Background.....	2
1.2.1 Previous work on PREs .....	2
1.2.2 Relationship of PREs to heavy rainfall events.....	4
1.2.3 PREs in the context of ET of TCs.....	8
1.2.4 Remote rainfall associated with TCs in the North Pacific.....	10
1.3 Thesis format .....	10
2. Data and methods.....	16
2.1 PRE identification.....	16
2.2 PRE stratification scheme.....	18
2.3 Composite analysis .....	19
2.4 Case studies.....	20
2.5 Diagnostics.....	21
2.5.1 QG forcing for vertical motion .....	21
2.5.2 Frontogenesis .....	22
2.5.3 Moisture contributions.....	23
2.5.4 Impact of diabatic heating on the upper-tropospheric flow .....	24
3. Climatology of PREs during 1988–2008.....	30
3.1 Overview.....	30
3.2 Monthly distribution .....	30
3.1 Geographic distribution and favorable TC tracks.....	31
3.2 Other statistical properties .....	33
4. PRE-relative composite analysis .....	40
4.1 JR category.....	40
4.1.1 Synoptic-scale evolution.....	40
4.1.2 Impact of diabatic heating on the upper-tropospheric flow .....	41
4.2 SJ category .....	43
4.2.1 Synoptic-scale evolution.....	43
4.2.2 Impact of diabatic heating on the upper-tropospheric flow .....	44
4.3 DC category .....	45
4.3.1 Synoptic-scale evolution.....	45
4.3.2 Impact of diabatic heating on the upper-tropospheric flow .....	46
5. Case studies.....	54
5.1 PRE ahead of TC Rita (2005).....	54
5.1.1 Event overview .....	54

5.1.2 Radar observations.....	54
5.1.3 Synoptic-scale environment.....	56
5.1.4 Processes leading to heavy rainfall.....	58
5.1.4.1 Lifting mechanisms.....	58
5.1.4.2 Moisture contributions from TC Rita.....	59
5.1.4.3 Impact of diabatic heating on the upper-tropospheric.....	61
5.2 PRE ahead of TC Ernesto (2006).....	62
5.2.1 Event overview.....	62
5.2.2 Synoptic-scale environment.....	64
5.2.3 Processes leading to heavy rainfall.....	65
5.2.3.1 Lifting mechanisms.....	65
5.2.3.2 Moisture contributions from TC Ernesto.....	67
5.2.3.3 Impact of diabatic heating on the upper-tropospheric flow.....	68
5.2.4 Processes contributing to an along-track PRE.....	69
5.2.4.1 Synoptic-scale influences on the track of TC Ernesto.....	70
5.2.4.2 Mesoscale distribution of the TC Ernesto rainfall.....	71
5.3 PRE ahead of TC Wilma (2005).....	73
5.3.1 Event overview.....	73
5.3.2 Satellite and radar observations.....	74
5.3.2.1 Satellite observations.....	74
5.3.2.2 Radar observations.....	75
5.3.3 Synoptic-scale environment.....	76
5.3.4 Processes leading to heavy rainfall.....	77
5.3.4.1 Lifting mechanisms.....	77
5.3.4.2 Moisture contributions from TC Wilma and TS Alpha.....	79
5.3.4.3 Impact of diabatic heating on the upper-tropospheric.....	80
6. Summary and discussion.....	117
6.1 Climatology of PREs during 1988–2008.....	117
6.2 PRE-relative composite analysis.....	119
6.3 Case studies.....	122
6.3.1 PRE ahead of TC Rita (2005).....	122
6.3.2 PRE ahead of TC Ernesto (2006).....	124
6.3.3 PRE ahead of TC Wilma (2005).....	127
6.4 Conceptual models for use in operational forecasting.....	128
6.4.1 JR category.....	129
6.4.2 SJ category.....	130
6.4.3 DC category.....	130
7. Conclusions and suggestions for future work.....	135
7.1 Conclusions.....	135
7.2 Suggestions for future work.....	136
References.....	139
